Technical Brief

MuleSoft Anypoint Platform on Salesforce Government Cloud Plus

MuleSoft
from salesforce

MuleSoft Anypoint Platform on Salesforce Government Cloud Plus (MuleSoft Government Cloud Plus) is a dedicated, isolated cloud infrastructure built on Salesforce Government Cloud Plus specifically designed for U.S. federal, state, and local government agencies, government contractors, and federally funded research centers.

With MuleSoft Government Cloud Plus, U.S. public sector organizations can scale, govern, and secure AI agents, MCP servers, APIs, and integration applications on a trusted platform. Public Sector organizations can drive efficiency and improve constituent experiences while meeting stringent compliance authorizations, now including FedRAMP Class D (formerly FedRAMP High), DoD Impact Level 2, IRS-1075, and CJIS. FedRAMP Class is reserved for the federal government's most sensitive, unclassified, and mission-critical data and MuleSoft has met all the standards your agency needs for housing this information.

Compliance Certification

The following table compares compliance certifications between standard MuleSoft and MuleSoft Government Cloud Plus environments. Customers share responsibility for configuration. More Information can be found at trust.salesforce.com. See the full list of compliances here.

Certification	Standard MuleSoft	MuleSoft Government Cloud Plus
FedRAMP Class D (Formerly Known as FedRAMP High)		✓
DoD IL2		✓
CJIS		✓
IRS-1075		✓
ISO 27001	✓	✓
ISO 27017	✓	✓
ISO 27018	✓	✓
ISO 9001	✓	✓
SOC 1	✓	✓
SOC 2	✓	✓
PCI	✓	✓

Certification	Standard MuleSoft	MuleSoft Government Cloud Plus
HIPAA	✓	✓
HITRUST	✓	✓
TX-RAMP	✓	✓
NIST SP 800-171	✓	✓

MuleSoft Government Cloud Plus also provides FIPS 140-3 compliant out-of-the-box connectors for simpler integrations in Anypoint Exchange. Omni Gateway (MuleSoft's AI and API gateway) is also FIPS 140-3 compliant.

High-Level Architecture

The following reference architecture outlines how the features available in MuleSoft Government Cloud Plus interact with one another, from agent governance and development through API management and runtime deployment.

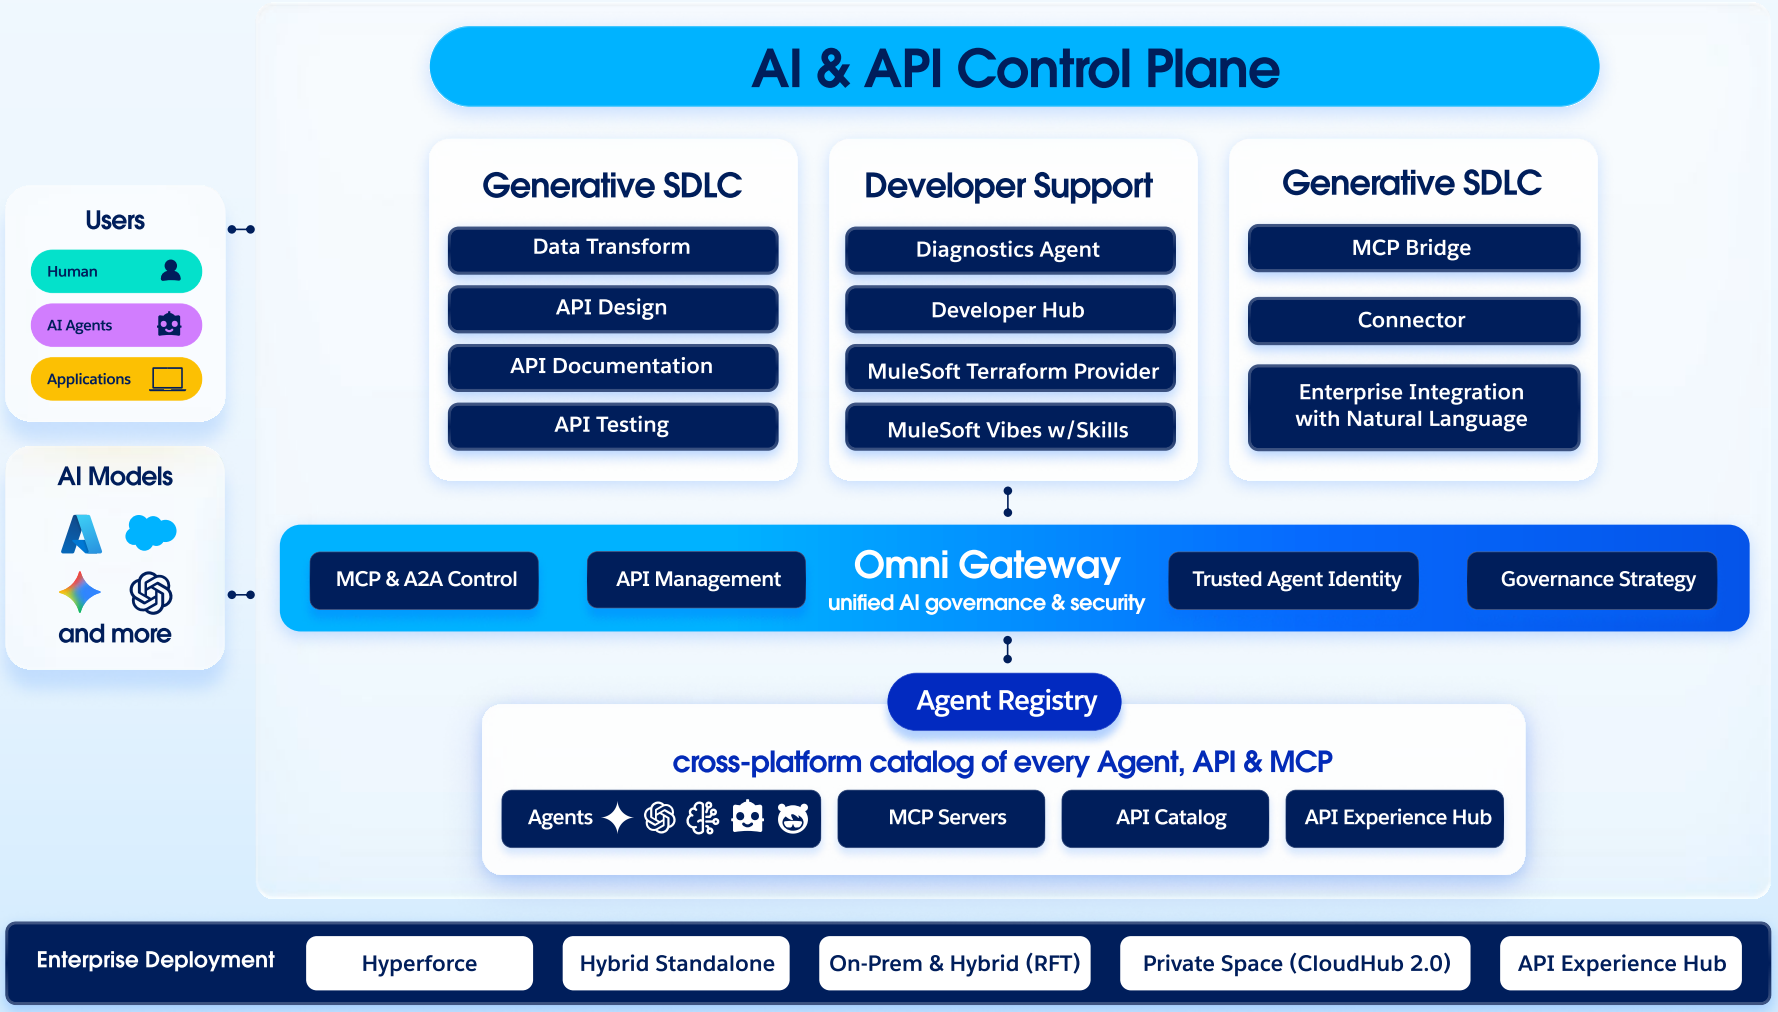

Fig 1. A reference architecture of features available in MuleSoft Government Cloud Plus.

Supported Deployments and Features

With MuleSoft Government Cloud Plus, following deployment options for Mule Applications (integrations and APIs) and Omni Gateway are supported:

CloudHub 2.0	In Virtual Private Space hosted by MuleSoft
Runtime Fabric	Hosted in customer-hosted or managed Kubernetes cluster infrastructure
Hybrid Standalone Deployments	Hosted in customer-hosted or managed physical server or virtual server

Mule Runtime can be hosted in all three deployment options. Versions starting from Mule Runtime 4.9 (LTS) and Mule Runtime 4.13 (Edge) are supported in MuleSoft Government Cloud Plus. Omni Gateway can be hosted in both CloudHub 2.0 and Runtime Fabric. All versions starting 1.13.0 are supported.

Refer to Features Supported on MuleSoft Government Cloud Plus for the full list of features and latest updates.

Federal IT modernization and AI adoption, made simple

Take your legacy tech into the future on a platform built for FedRAMP Class D, DoD IL2, IRS-1075, and CJIS requirements.

Integrate and automate at the highest level of trust, Salesforce's #1 Value, with MuleSoft Vibes. Use natural language to modernize lifecycle management and deliver the services citizens rely on.
Accelerate agentic adoption with Agent Fabric. Register, govern, and secure the agents and MCP servers you have now, and everything you build next.

Talk to a MuleSoft expert about amplifying your agency's AI and integration priorities on MuleSoft Government Cloud Plus, the first iPaaS solution that is FedRAMP High certified.
